GUARD TOUR SYSTEM
Access Control System

Model -NS-GS1-V100

Overview

Guard tour system is a monitoring tool used to track the movements of security personnel and ensure that they are performing their duties at designated locations and times.

The system uses various technologies such as RFID, GPS, and barcode scanning to monitor and record the security officer's activities. It provides real-time data and alerts for enhanced security and accountability.

Features

- Various technologies used to track and record guard activity.

- Provides real-time data and alerts for enhanced security and accountability.

- Can be set up to monitor specific locations and activities.

- Equipped with anti-tamper mechanisms to prevent fraud.

- Data is stored securely in the cloud for easy access and analysis.

- Can be accessed and monitored through a mobile app.

Benefits

- Tracks and monitors guard activity to ensure compliance.

- Provides real-time data and alerts to help ensure guards are on task.

- Can be tailored to specific security needs, including adding checkpoints.

- Helps in automating the record-keeping process.

- Can help reduce labor costs by optimizing guard deployment.

- Provides detailed data and reports for analysis.

Technical Specifications

Storage Capacity	60,000 pieces
Battery	3.7V/1150mAh rechargeable lithium battery
Dimension	148mm x 42mm x 34mm
Operating Temperature	0 0 -40 to +85 C
Communication	Pogo Pin USB, 11,000 records per minute
Weight	243KG
