HAND HELD METAL DETECTOR

Inspection Control System

Model - NS-HS2-V111

Overview

Hand-held metal detector is a small, portable device used for detecting metal objects. It is commonly used in security and law enforcement to scan individuals for concealed weapons or other metal objects.

The device emits an electromagnetic field, which is disrupted by metal objects, producing an audible and/or visual alert.

Features

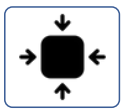

- Automatic setting, no manual adjustment needed
- Dual LED indication – Green for power, Red for metal detection
- Detects both ferrous and non-ferrous metals
- Audio, visual & vibration alerts
- Continuous alert for low battery
- Low sensitivity mode detects only large metal objects

Benefits

- Efficiently detects concealed metal objects and minimizes security threats.
- Does not require physical contact with individuals.
- Easy to carry around and operate, suitable for high traffic areas.
- Detects all types of metal, including ferrous and non-ferrous metals,
- A budget-friendly option for small and large organizations
- User-friendly interface ensures has sle-free operation.

General Specifications	
Dimension	414 mm (L) x 88 mm (W) x 40 mm (H)
Net Weight (With battery)	370 grm
Net Weight (Without battery)	333 grm
Specifications	
Power	Operate on 9V Rechargeable Battery/ Dry battery
Working Voltage	DC 9Volt
Indications	Green (ON), Red (Metal) & Continuous Red Light with Beep Sound (Low Battery)
Humidity	Upto 95% non-condensing
Working Temperature	-20°C to + 70°C

High Sensitivity

Small and Exquisite

Audible or Vibrating Alarm

Superior Shock Resistance

Light Weight
