

FULL AUTOMATIC SWING GATE

Entrance Management System

Model -NS-SSI-V4IDI/2

Overview

Full automatic swing gate is commonly used in commercial and residential settings to control access to driveways, parking lots, and other restricted areas.

It offers enhanced security, convenience, and safety by incorporating sensors to prevent accidents, customizable design options, durable construction, and the ability to control the gate from a distance.

Features

- Gate panels swing inward or outward automatically.
- Can be opened or closed from a distance using a remote control.
- Made from sturdy materials to withstand heavy use.
- Supports anti-tag after, and anti-hit against the feature.
- Can be tailored to specific design, and security requirements.
- One person can pass with one card at a time,

Benefits

- Provides a barrier to control access and enhance security.
- Opens and closes automatically, saving time for users.
- Equipped with sensors to prevent collisions and accidents.
- Can be designed to meet specific design and security needs.
- Made from quality materials for long-lasting use.
- Enhances the appearance and value of properties.

Technical Specifications

Dimension	1200*185*970mm
Material	304 stainless steel, tempered glass, acrylic
Channel Width	600-850mm
Outer Box	1.0mm
Motor	DC 24V brushless motor, low noise
Traffic Direction	1-way traffic/2-way traffic; Traffic speed: 35-40 persons /m
Opening Signal	Dry contact signal
Life	≥ 6 million times
Infrared Quantity	4 pairs
Power	40-60W
Applicable Temperature	- 20~75℃
