

FULL AUTOMATIC SWING GATE

Entrance Control System

Model -NS-SSI-V4ID3

Overview

Full automatic swing gate is a type of access gate designed to open and close automatically. It typically consists of two panels that swing inward or outward when activated.

The gate is commonly used in commercial and residential settings to control access to driveways, parking lots, and other restricted areas.

Features

- It has the function of fault self-inspection with alarm prompt.
- Consists of two panels that swing in/out.
- Can be adjusted to suit different traffic conditions.
- Supports Audible and visual alarm function.
- Equipped with safety sensors to prevent accidents.
- Built to withstand different weather conditions.

Benefits

- Improved security by restricting access to authorized personnel.
- Enhanced convenience by automating the entry/exit process.
- Reduced need for manual supervision or security personnel.
- Durable construction for long-term use and easy maintenance.
- Customizable options for integration with access control systems.
- Improved aesthetics and modern appearance.

Technical Specifications

Dimension	1200*185*970mm
Material	304 stainless steel, tempered glass, acrylic
Channel Width	600-850mm
Outer Box	1.0mm
Motor	DC 24V brushless motor, low noise
Traffic Direction	1-way traffic/2-way traffic; Traffic speed: 35-40 persons /m
Opening Signal	Dry contact signal
Life	≥ 6 million times
Infrared Quantity	4 pairs
Power	40-60W
Applicable Temperature	- 20~75℃
