

TYRE KILLER

Tyre Killer

NS-TKS10-H280

Overview

The Tyre Killer is a security system designed for controlled access. Spanning 2.8m, it uses spikes in a blocking position to prevent unauthorized vehicles. The control cabinet manages the system at 380V AC, ensuring effective security measures with a smooth 2-3 second rise and lowering mechanism. It is a durable and resilient system designed for enhanced security measures.

Features

- ▶ 2.8m length for full coverage
- ▶ 60-degree blocking position
- ▶ Dual loop safety detection
- ▶ Emergency hand pump operation
- ▶ 380v ac control cabinet
- ▶ Fast 2-3s rise and lowering

Benefits

- ▶ Rapid action enhances security measures
- ▶ Emergency hand pump for power failures
- ▶ Loop detections ensure safety
- ▶ Robust construction for longevity
- ▶ Suitable for high-security access points
- ▶ Reliable performance with 380V AC supply

Technical Specifications

Tyre killer Length	2.8M. Spikes 60 degree blocking position approx. 450 mm above ground. Two loop detections should be provided for safety operations
Rising time	2-3sec and lowering time 2-3sec .
Hand pump	for emergency operation in case of power failure accumulator is built in Control cabinet for tyre killer
Voltage	380V AC
